

Happy, Healthy Skin by...

Turning Back the Clock!

Collagen Infusion Therapy is a new procedure which has the amazing ability to naturally stimulate collagen and elastin production in the skin without damage. The treatment is effective for both **men** and **women**, and has numerous beneficial effects.

This new procedure is a non-surgical, non-ablative treatment for various skin conditions. It can be used to reduce deep wrinkles, fine wrinkles, skin creases and lines such as crows feet, smile lines (or laughter lines). It will also reduce creases in the skin of the forehead (scowl lines), lines around the mouth, on the neck and jaw line (including jowl lines), the décolleté (chest), the backs of the hands and more.

Effectiveness

Clinical studies in France have shown that collagen infusion therapy is more effective than laser resurfacing and just as effective as non-ablative treatments such as CO2 laser and Fraxel in stimulating collagen and elastin production; resulting in thickening the skin, thereby reducing wrinkles and smoothing scars.

Gentle Method

Gentle stimulus provided by the collagen infusion therapy is painless and skin-friendly, and thus far more acceptable than many other invasive and more expensive treatments. It leaves the entire epidermal barrier fully intact. Micro-channels are created in the skin by 300-precision surgical needles. The formed channels are long enough for new collagen structures to form within the lower layers of the skin and short enough to allow the client to resume normal activity immediately.

Collagen infusion therapy increases the penetration capacity of nutrients through the epidermis and dermis of skin cells. It is forty times more effective than simply applying products to the skin's surface.

The therapy device is able to part the pores of the top layer of the skin without damage. The pores close again about an hour later. During the time the pores are open, the skin is significantly better able to absorb and benefit from skin serums and creams applied after the treatment.

Try it today!

The skin naturally renews itself every 40 days, so with a little stimulation changes can be dramatic and fast. Noticeable results can be seen immediately!
